CHOOSES A HUSBAND.

Mecklenburg-Schwerin.

Announcement of the Royal Betrothal Cheered by the Members of The Netherlands Parliament -Cabinet Opposed Match.

The announcement of the betrothal of Queen Wilhelmina to Duke Henry of Mecklenburg-Schwerin in the second chamber of The Netherlands parliament the other day was greeted with cheers. The house charged the president to transmit to the queen its congratulations and thanks for communicating the glad event, which was of the highest importance to the dynasty and country.

The announcement has been sympathetically received by the whole German press, although nearly all the papers point out that the event is devoid of political significance. Attentween the two countries. Mention is pose in the Tuxedo district. made of the close relations of lanin Germany.

the wishes of the Dutch cabinet, who estate. rescued her and the queen mother a delight. from a serious accident while they were driving in the Sans Souci park. At that time she seemed to be seristrong objections of the Dutch cab- money. inet, who urged that an alliance with a Prussian prince might bring political entanglements.

The young duke is in habits and manner a typical German officer. He has traveled to India and North Cape. Recently he has been much in evidence in Berlin and Potsdam and in court, military and diplomatic socieety, where he is appreciated as an indefatigible dancer. He is also a fine equestrian. His brother, Duke Adolf Friedrich, is a noted steeplechaser.

SUCCESSFUL AIRSHIP TRIAL

Coun von Zeppelen's Invention Proves to Be a Remarkable One.

Count von Zeppelen gave his airship Friedrichshafen and achieved a notable required was such as to demand spe- mission. In his practice M. Willot success. After rising the airship re- cial processes, and the steelmakers re- means apparently to use deep shafts mained poised at a height of 600 meters for three-quarters of an hour. It then they were loaded up with other orders currents through different geological made a series of tacks and performed requiring less care and producing sundry turning maneuvers, after which greater returns. The representations it was steered against the wind. It finally headed toward Immenstadt, an inquiry conducted on its own acwhere the inventor landed after a trip that lasted about an hour.

The king and queen of Wurtemburg witnessed the trial from the deck of

The airship carried four persons be sides Count Zeppelen. When it rose the wind was from the northeast, blowing at a velocity of 31/2 yards per second. When the airship had attained a height of 400 yards it described a circle, and then drove with the wind in a generally circular direction for about six miles. It then again described a circle, after which it made headway against the wind, which was then blowing with increased velocity. Eventually the airsteadiness into the lake and was towed to a shed.

The experiment was successful. Its stability, equilibrium and steering powers were excellent. It is generally agreed that considerable progress has een made since its first ascent.

ARIZONA'S GAIN.

Consus Shows Increase of 104.9 Per Cent. in Population in a Decade.

The census bureau has made public the returns of population for the territory of Arizona. The population of the territory in 1900 is 122,212, as compared with a population in 1890 of 59,620. This shows an increase during the decade of 62,592, or 104.9 per cent. This large increase is due in part to the fact that there were 28,469 Indians and 154 other persons, or a total of 28,623 persons, on Indian reservations, etc., in Arizona, who were specially enumerated in 1890 under the provisions of the census act. but were not included in the general population of the territory at that cen-

The population of the territory in 1870 was 9,658, and during the ten years from 1870 to 1880 it increased 30,782, or 318.7 per cent., giving a population in 1880 of 40,440. The population in 1890, as given in the report for that census, was 59,620, representing an increase during the decade of 19,180, or 47.4 per cent. The population of Arizona in 1900 is more than 12 times as large as the. population given in 1870, the first census taken after its organization as a territory in 1863

The total land surface of Arizona is, approximately, 112,920 square miles, the average number of persons to the square mile of the censuses of 1890 and 1900 being as follows: 1890, 0.5; 1899, 1.

An Explanation. Those chief justices who didn't vote for Elias Howe's admission to the Hall of Fame probably have it in for him, suggests the Chicago Times-Herald, because he didn't fix his machine so it would sew on suspender buttons.

MORE DELAY.

Contractors Unable to Finish Torpedo Boats and Destroyers in Time Specified.

There is more delay in the completion of the large number of torpedo boats and torpedo boat destroyers which the government is building under contracts at various yards in various parts of the country. A year ago the navy department consented to extend the time of the contractors engaged on this work for 12 months. It was expected that there would be no difficulty in completing the craft within that period. The delay was occasioned, the contractors say, by the scarcity of steel.

fused to take orders for the steel when as starting stations, transmitting his were sustained by the department in count, and the contracts accordingly were extended with the expectation that there would be no more difficulty and that the boats would be completed by this time.

The years' extension has expired, and most of the boats and destroyers are still far from completion, many of them are but three-quarters ready for trial, and a great deal of work remains to be done on board the ships before they can be turned over to the government. It is quite evident, say the naval constructors, that there must be another extension of time, or the contractors will be subjected to heavy fines which will deprive them of the ship descended with great ease and meager profit involved in the construction of such small ships of war as torpedo boats and torpedo boat destroy-

DISCUSS THE SERVANT GIRL

Attendants at the Household Economic Association Consider Problems of the Day.

The National Household Economic convention at Toronto, Ont., the other day was addressed by Mrs. Hoodless, of Hamilton, Ont., who said that the Ontario government was the first in the world, so far as she has been able to learn, to have a normal Tchool for domestic science teaching.

At the afternoon session the allabsorbing "servant girl problem" came up for debate. In comment on the suggestion that, as there are 100 typewriter girls seeking places to one cook, commercial education for girls be dropped out of the public school curriculum and cooking put in its place, Mrs Helen Campbell made a speech saying the age was one of progress, and the domestic, after long guaranties against outrageous and Write at once. years, was coming to her own. Those engaged in this work were going to rise in the social plane, she said, possibly by the general adoption of the New Zealand system of domestic labor bureaus, graduated wages, and other regulations raising service to the status of a trade.

Mrs. Florence Kelley said her experience in Hull house, Chicago, had proved that the real objection to domestic service was that it separated girls from their own home life.

BULL TRIES TO TOSS A CAR. The Pugnacious Brute Not Meeting with Success the Animal Quietly Walks Away.

A large bull belonging to some one living along the line of the Westchester & Philadelphia Traction company, near Philadelphia, is of a decidedly pugnacious disposition. It had several times been noticed by the motormen standing at a fence looking contemplatively at the car as it whizzed past. The other day it got out and as a car came along jumped between the tracks and

The car was too close to be stopped, or even to have its speed checked, and Jack MacMaster, Harvard's veteran ent result was that the dashboard of
